

Brainstorming & Idea Prioritization Template

Date	30 May 2026
Team ID	XXXXXX
Project Name	Smart Crop
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Bharthavarapu Prema Likhitha	Smart Crop Recommendation: Develop an engine where farmers enter N, P, K, soil temperature, humidity, pH, and rainfall to discover the highest-yielding crop for their land.	Software / Analytics	Group 1
2	Nallagorla Varsha	Crop Suitability Assessment: Build a system where users input a specific crop to evaluate if current environmental and climate conditions match its needs.	Testing / Evaluation	Group 2
3	Pilla Jayachandra	Agricultural Research Platform: Provide historical data trends and predictive analytics for researchers to spot long-term crop-	Data Insights	Group 3

		environment interaction patterns		
4	Polampalli Akhil	Policy Planning Dashboard: Design a visual interface for policymakers to create evidence-based, sustainable regional farming strategies	Policy Planning	Group 3
5	Pulivarthi Venkata Nikhil	Resource Efficiency Engine: Integrate real-time recommendation updates to help farmers maximize resource efficiency and use optimal fertilizers.	Resource Optimization	Group 1

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Scenario 1: Smart Crop Recommendation for Farmers (Focuses on inputting N, P, K, climate data for optimal yield).	High	High	Top	Yes
2	Scenario 2: Crop Suitability and Environmental	High	Medium	Medium	Yes

	Assessment (Focuses on crop compatibility and productivity potential checking).				
3	Scenario 3: Agricultural Research and Policy Planning (Combines research insights and policy decision tools for sustainable strategies).	Medium	High	High	Yes
